At REAch2, our actions and our intentions as school leaders are guided by our Touchstones.

Leadership

Finding the leader in all of us.

Inclusion

Realising the greatness in our difference.

Learning

Creating exceptional opportunities for learning.

Enjoyment

Loving what we do.

Inspiration

Feeling the power of the possible.

Integrity

Being courageously true to our purpose.

Responsibility

Unwavering commitment to seeing things through.

1. Aims

This policy aims to ensure that:

- Pupils, staff and parents understand how our school will support pupils with medical conditions
- Pupils, staff and parents understand how our school will support pupils with administration of any medicines
- Pupils with medical conditions and requirements for administration of any medicines are properly supported to allow them to access the same education as other pupils, including school trips
- The safety and welfare of pupils, including their physical and mental wellbeing, is promoted at all times
- A culture of safety, equality and protection is promoted

We will ensure implementation of this policy by:

- Making sure sufficient staff are suitably trained
- Making staff aware of a pupil's condition, where appropriate
- Making sure there are cover arrangements to ensure someone is always available to support pupils with medical conditions and administration of medicines
- Developing and monitoring healthcare plans
- Developing individual Personal Emergency Evacuation Plans (PEEPs)

The named person with responsibility for implementing this policy is Mrs Sarah Hornsby, Inclusion Lead.

2. Legislation and statutory responsibilities

This policy meets the requirements under Section 100 of the Children and Families Act 2014, which places a duty on governing boards to make arrangements for supporting pupils at their school with medical conditions. It is based on the requirements outlined in the Department for Education's statutory guidance 'Supporting pupils at school with medical conditions', and is intended to be in accord with all other statutory/guidance documents referenced therein. Please see the statutory guidance itself for further information.

For the purposes of this policy, 'parents' refers to any individual who holds parental responsibility for the child in question.

3. Roles and responsibilities

3.1 The governing body

The governing body has ultimate responsibility to make arrangements to support pupils with medical conditions, which includes the administration of medicines. The governing body will ensure that sufficient staff have received suitable training and are competent before they are responsible for supporting children with medical conditions and/or administration of medicines.

3.2 Key roles

The Headteacher will:

- Make sure all staff are aware of this policy and understand their role in its implementation
- Ensure that there is a sufficient number of trained staff available to implement this policy and deliver against all healthcare plans and requirements for administration of medicines, including in contingency and emergency situations
- Take overall responsibility for the development of healthcare plans
- Ensure that liaison takes place with named healthcare professionals in the case of any pupil who has a medical condition that may require support at school

- Ensure that systems are in place for obtaining information about a child's medical needs and any needs for administration of medicines, and that this information is kept up to date

The Inclusion Lead will:

- Liaise with parents regarding their child's medical needs
- Draft health care plans following conversation with parents and ensure parents sign to say they agree with the plans
- Share health care plans with relevant staff
- Review health care plans annually (unless parents advise that medical conditions have changed)
- Maintain Health Care Plan Register
- Update Arbor with medical information stated on medical forms

The Office Staff will:

- Ensure that documentation regarding medical conditions is included within induction packs sent out to parents of new pupils
- Update Arbor with medical information stated on medical forms

3.3 Staff

Supporting pupils with medical conditions during school hours is not the sole responsibility of one person. Any member of staff may be asked to provide support to pupils with medical conditions, although they will not be required to do so. This includes the administration of medicines. Those staff who take on the responsibility to support pupils with medical conditions and/or administration of medicines will receive sufficient and suitable training, and will achieve the necessary level of competence before doing so. Staff required to administer medicines are covered by the Academy's liability insurance, a copy of which is available on request. Teachers will take into account the needs of pupils with medical conditions that they teach. All staff will know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

3.4 Parents

Parents will:

- Provide the school with sufficient and up-to-date information about their child's medical needs, including required information about administration of medicines
- Be involved in the development and review of their child's healthcare plan
- Carry out any action they have agreed to as part of the implementation of the healthcare plan
- Submit a completed permission form prior to before bringing medicine into school
- Provide the school with the medicine their child requires
- Notify the school if their child's medical condition and/or medicine changes or is discontinued, or any changes in the dose or administration method
- Ensure they, or another nominated adult, are contactable at all times in case of medical emergencies. N.B. we request that there are two or more emergency contact phone numbers for all pupils

3.5 Pupils

Pupils with medical conditions will often be best placed to provide information about how their condition affects them. Pupils should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of their healthcare plan. They are also expected to comply with their healthcare plan.

4. Equal opportunities

Our school is clear about the need to actively support pupils with medical conditions to participate in school activities, including trips and visits, and not prevent them from doing so. The school will consider what

reasonable adjustments need to be made to enable these pupils to participate fully and safely. Risk assessments for any activity will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included, which will include any need for administration of medicines. In doing so, pupils, their parents and any relevant healthcare professionals will be consulted.

5. Being notified that a child has a medical condition

Parents are expected to notify the school as soon as they are aware of a new medical condition, or any changes to an existing medical condition, for their child. When notified of this, the process outlined below will be followed to decide whether the pupil requires a healthcare plan. The school will make every effort to ensure that arrangements are put into place within two weeks, or by the beginning of the relevant term for pupils who are new to our school.

6. Healthcare plans

The Headteacher has overall responsibility for the development of healthcare plans for pupils with medical conditions. Operational oversight of these tasks has been delegated to Mrs Sarah Hornsby, Inclusion Lead.

Not all pupils with a medical condition will require a healthcare plan. It will be agreed with a healthcare professional and/or parents when a healthcare plan would be inappropriate or disproportionate. This will be based on evidence.

Healthcare plans will be developed with the pupil's best interests in mind and will set out what needs to be done, when and by whom. They will be drawn up in partnership with the school, parents and a relevant healthcare professional, such as the school nurse, specialist or paediatrician, who can best advise on the pupil's specific needs. The pupil will be involved wherever appropriate. The healthcare plan will be linked to, or become part of, any education, health and care (EHC) plan. If a pupil has SEN but does not have an EHC plan, the SEN will be mentioned in the healthcare plan as required. The final agreement of a parent will be sought before implementation.

The level of detail in the healthcare plan will depend on the complexity of the child's condition and how much support is needed. The following factors as a minimum will be considered when deciding what information to record:

- The medical condition, its triggers, signs, symptoms and treatments
- The pupil's resulting needs, including medicine (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons
- Specific support for the pupil's educational, social and emotional needs; for example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions
- The level of support needed, including in emergencies. N.B. if a pupil is self-administering any medicines, this will be clearly stated with appropriate arrangements for monitoring
- Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional, and cover arrangements for when they are unavailable
- Who in the school needs to be aware of the pupil's condition and the support required
- Arrangements for written permission from parents and the Headteacher for any medicines to be administered by a member of staff, or self-administered by the pupil during school hours
- Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g. risk assessments
- Where confidentiality issues are raised by the parent/pupil, the designated individuals to be entrusted with information about the pupil's condition
- What to do in an emergency, including who to contact, and contingency arrangements

Plans will be reviewed at least annually, or earlier if there is evidence that the pupil's needs have changed.

Administration of medicines

If administration of medicines is required during the school day, parents are requested to inform the school as soon as possible. Both prescribed and non-prescribed medicines, i.e. for hayfever, can be administered at school: in the case of prescribed medicines, parents will be required to provide evidence from the child's GP; in the case of non-prescribed medicines, parents will be required to share the reasoning for the administration of the medicines and the anticipated timescale for this prior to the school giving agreement to do so. Where possible, we request that medicines be administered at home by parents before or after school, unless otherwise stated by a medical professional. Evidence of any required change to prescribed medicines must be provided to the school immediately to ensure immediate implementation; this may require supplying newly labelled prescriptions or items in line with such changes.

All staff authorised to administer medicines will follow administration procedures as advised by a healthcare professional and as agreed with the parents and child. Where the medicine requires specialist technique or equipment, e.g. inhaler, the members of staff responsible for administration will be required to demonstrate competence before taking on this role, as assessed by the Headteacher and additionally by a healthcare professional if required. In the event of pain medicine needing to be administered as part of a care plan, or in the event of administration of non-prescription pain medicine explicit consent will be needed from parents in order to check the most recent dosage and ensure administration is within safe guidelines; in this instance, contact will be made with parents to clarify the most recent dosage and to agree further administration of the pain medicine, if necessary. A written record of this discussion will be requested to be signed by parents at the end of the school day. Parents have the opportunity to come into school to administer any medicines should they wish to do so, or if this is deemed the most appropriate option for the child. If a child refuses to take medicines, staff will not force them to do so, but will note this in the records and inform parents immediately or as soon as is reasonably possible.

We may, in the event of a critical situation, administer medicine to a child without consent of a parent if the First Aider or medical services believe there is imminent life risk. Parents will be informed of this action as soon as is practically possible.

Receipt, storage and disposal of medicines

We will compile a medicines list detailing information concerning all medicines for which we have permission to be administered within the school, including details of dose and frequency. This will be stored confidentially, within easy reach of the medicine itself, so that it can be quickly and easily referred to.

Each class has a medicine box into which the class' medication is placed. This medicine box is kept in the locked cupboard in the classroom.

All medicines must be delivered to the school office by the parent in person, who will then be required to complete and sign a permission form (see appendix) Under no circumstances will medicines be left in a child's possession, unless immediate emergency treatment is expected to be required, i.e. use of inhaler during sporting activity. We can only accept medicines in their original containers as dispensed by a healthcare professional, complete with original labels and/or accompanying written directions. We cannot accept medicines that have been taken out of their original container. Each item of medicine must be clearly labelled with the following information:

- Pupil's name
- Name of medicine(s)
- Dosage
- Frequency and timing of administration
- Date of dispensing

- Storage requirements (if relevant)
- Expiry date

If relevant, parents are required to provide full details of any rescue therapy, including the dosage and frequency of administration, and any additional action to be taken if this is not effective.

It is the parent's responsibility to ensure that all medicines are in date and suitable for use. The member of staff receiving the medicines will check the items against the information stated on the form, and place the items in the approved secure storage location, clearly named and labelled. Where a child is prescribed emergency medicines (e.g. inhalers, EpiPen) it will be securely stored in a location that is easily available if required in an emergency, including during any external activity or trip. If required, the temperature of the facility used to store any medicines, including a medicines fridge, will be recorded on a daily basis to ensure that the required temperature is maintained.

In the event of medicines needing to be transported to and from school on a daily basis, i.e. antibiotics, the parent is responsible for ensuring that both delivery and collection occurs.

The school is not responsible for disposing of medicines and in the event that medicines are out of date then parents will be requested to collect it. Parents are responsible for ensuring that expired or unwanted medicines are returned to the pharmacy for safe disposal. Parents must collect all unused medicines at the end of the agreed administration period. Should medicines be left at school beyond three months, despite attempts made to contact the parent to collect it, it will be given by the school to a pharmacy for safe disposal.

All medication, used or unused, must be collected and signed out on the last day of each academic year.

Documentation

Each occasion where medicines are administered will be recorded on the medicine record form (record of administration). This information is confidential to school staff and will be stored and retained securely in line with REAch2's record retention policy.

Policy review

This policy will be reviewed every three years. Review will take place more regularly in the event of changes to statutory requirements, or in light of feedback arising from pupils, parents or staff involved with supporting pupils with medical conditions and/or administration of medicines.

Kemsley Primary Academy

Date Collected:

Signature:

Medicine Record

The school will not give your child medicine unless you complete and sign this form.

To be completed by the parent/carer:

Name of child	
Date medicine provided by parent	
Date for review to be initiated by	
Class	
Quantity received	
Name and strength of medicine	
Expiry date	
Quantity returned	
Dose and frequency of medicine	
Self-administration (Yes or No)	
Other information (e.g. storage instructions or details for inhalers, side effects that the school should be aware of)	

- I request that the above named pupil be given this medication while at school.
- I have given the first dose of this medication to my child and no adverse reaction has been observed.
- I realise that this is not a service that the school is obliged to undertake.
- I accept full responsibility for informing the school if my child has been given a dose of this medication before coming to school.
- I accept responsibility for ensuring that the medicine has not expired and that there will be enough medicine supplied to the school for my child's needs.
- I will collect all unused medicine from the school at the end of the summer term.
- I accept that, if contacted and I do not collect used or unused medication after three months, the school will give it to the pharmacy for safe disposal.

Parent / Carer's name (please print):

Signature of Parent/Carer Date

To be completed by the school:

*I confirm that the medication is in date and dosage above corresponds with the dosage on dispensing label.
The above named child will be given/supervised whilst he/she takes their medication by a member of staff.*
